

D1  
cont. 12 in said irradiated plane, radiant energy of radiation at a wavelength in  
13 a range of 1100 nm to 2.5  $\mu$ m is greater than zero and smaller than radiant energy  
14 of radiation at a wavelength in a range of 600 nm to 1100 nm.

---

D2 1 17. (Twice Amended) A radiant energy radiation apparatus  
2 according to claim 1, wherein said means for radiating radiation in the predetermined  
3 wavelength range radiates radiation having a low visibility for a human within the  
4 range of 600 nm to 1100 nm and which deeply permeates into an organism to  
5 maintain/promote biofunctions.
